

Littlest Yacht Tender

**Unique
Coffee Table**

...Heirloom

Littlest Yacht Tender on the shore at Duck Trap Cove.

We've been designing and building traditional small craft for more than 30 years. Our Littlest Yacht Tender is a scaled-down version of our most popular yacht tender, 'Sunshine'. In fact, this version is built very nearly the same way as her waterborne counterparts, and with the same materials...Okoume planking, Spanish Cedar transom, mahogany trim...of course, this little lady has a plate glass top.

We only build a couple of these lovely little boats a year, but we've made it possible for you to build your own because we've drawn the full-size plans, complete right down to the shapes of the individual planks! The set of plans is only US\$75, available from us by phone, or using the secure ordering on our website. The URL for the Littlest Yacht Tender page is www.duck-trap.com/2003lyt.html

Working lapstrake yacht tenders can be expected to last 100 years and more. Just think how long this lovely little tender will last...Talk about a family heirloom!
